

IMPORTANT SITE PREPARATION

As a Fancy Flush client it's of the highest importance that we make your event as stress free and easy as possible. We've created this simple guide to help you prepare your site for the delivery of our restroom trailer and the delivery of other items as well such as tent rentals or catering.

In this example, our driving path to the drop off location is marked in blue. The entire path (roadway, driveway, and lawn) must be an easily drivable surface with a height clearance of 12ft & a width of 10ft. In addition, the location of the restroom trailer must be reasonably flat (ideally within 4 degrees).

Height Clearance Requirement

12ft height x 10ft width clearance is needed for a typical restroom trailer to pass (13ft clearance is recommended if event rental delivery trucks and some catering trucks are to pass as well).

**Note no object or structure can make contact with a restroom trailer including trees, branches, vegetation, power lines, site equipment, ladders, tents, awnings, signs etc.*

The trees are too low and narrow.

Slippery Jeep trail requiring 4wd & creek crossing.

Good height and width clearance & drivable road.

Driving Path Requirement

Delivery trucks are slightly less capable than the average 2wd car when towing a restroom trailer. Certain driving surfaces may be impassible for the following reasons: steep grade with unpacked gravel, loose rocks, muddy or slippery surfaces (like wet grass), steep humps or dips. **Note we cannot cross creeks, traverse jeep / farm trails, or drive through vegetation which might damage our vehicles or trailers.*

What Happens If These Requirements Are Not Met?

If these requirements are not met we cannot deliver our equipment to your site. Depending on the situation and severity...

- * Drop off at a different location (likely not ideal for you or your guests)
- * An extra fee (standby charge) if we are on site more than 30 minutes, and if it doesn't interfere with other deliveries
- * An additional delivery fee for us to return at a later time if we cannot drop at a different site or if it interferes with other deliveries
- * In the most severe cases, cancellation of your restroom order.

I'm not sure if my property is suitable for restrooms, event rentals etc, how can I know for sure?

You may schedule a site visit by us, or any of your other vendors to determine these requirements. If your site does not meet the requirements we can recommend solutions to prepare your site like purchasing an inexpensive pole saw (to cut down tree branches) to hiring a landscaping company. A simple DIY solution to check your site involves a tape measure, and a free smartphone app called "bubble level" to check how steep the ground is.

Standby / Wait Charge

- 0-30 min = \$0
- 30min - 1.5 hr = \$2/min
- 1.5hr + = \$4/min

Open flames such as candles and cigarettes are prohibited. (The interior of our restrooms is full of combustible wood & paper items. Electric candles are exempt)
